EXPERIENCE

11/04 to Present...The "Art" of Weather, 185 Pine Street #308 Manchester, CT 06040

Self employed as The "Art" of Weather. I present informational, education and entertaining programs about various topics in weather. The shows are presented in clear, easy to understand language. My 375 clients include retirement communities, assisted living facilities, senior centers, elementary, middle schools and high schools, condo associations, public libraries, museums, garden clubs, church groups and other civic organizations and private companies. I also present my weather shows on cruise ships and at various weather seminars and conventions around the country. As a weather consultant I prepare reports for attorneys in weather related legal matters. I also have co-produced and hosted a TV documentary about Hurricanes for CPTV the PBS station in Connecticut. I was nominated for an Emmy for this program and won a "Telly" Award for the same documentary in the summer of 2007. In the spring of 2008 I presented my program "Global Warming: Fact or Fiction" to members of the Connecticut legislature and the Governors office at the state capital. In 2008 and again in 2010 I was a guest speaker at the International Climate Change Conference. I write for magazines and web sites. I am a board member of the web site "ICECAP.US.

8/92 to 5/05...NBC 30, 1422 New Britain Avenue, West Hartford, CT 06110

Meteorologist for NBC television station. Improve stations image and profitability as ratings climbed from last to first place. Extensive "live shot" experience outdoors in storms brought much improved visibility and credibility to the station. Skilled in use of state of the art weather tools such as Doppler radar, weather graphics systems and new emerging technologies. Improved weather departments forecasting of hurricanes, blizzards, severe thunderstorms, tornadoes and weather affecting offshore and near shore environments. Developed, wrote and performed "The Weather Show" at the Science Center of Connecticut to educate students and teachers about weather. Meteorologist for WDRG radio AM and FM mornings and evenings. Expert witness for weather related litigation. Experienced in researching cases dealing with slip and fall, snow plowing contract discrepancies, car accidents, admiralty cases and workman's compensation cases.

2/85-6/92...WPTV TV 5, P.O. Box 510, Palm Beach, FL 33480

Chief Meteorologist for south Florida's NBC television station. Anchored weekday 5:00, 5:30, 6:00 and 11:00 pm news programs. Station won every newscast with highest ratings in station history. Greatly improved weather image of the television station. Improved the visual look of the weather forecasts with skilled use of computer graphics. Voted Best TV weatherman by Palm Beach magazine in annual "Best of Palm Beach" editions. Won numerous other awards as areas best TV weatherman. Duties included forecasting marine weather in the unique waters of the Gulf Stream. Worked mornings for WJNO radio as meteorologist for number one rated news, talk and information station. Established excellent working relationship with the National Hurricane Center. Developed partnership with the directors, Dr. Neal Frank and Dr. Bob Sheets. Established relationship with research meteorologists at the Atlantic Oceanographic and Meteorological Lab on Key Biscayne. Produced and anchored 14 popular bi-annual Hurricane specials warning of impending return of the active cycle of hurricanes. Traveled extensively across south Florida using slide show warning about the dangers of Hurricanes and their likely return. Weekly visits to public schools and civic groups improving market image of the television station. Hosted Easter Seal Telethon and worked with area charities. Expert witness for area attorneys.

6/84-9/84...WXYZ TV 7, 20777 West 10 Mile Road, Southfield, MI 48037

Freelance Meteorologist For news programs during the Summer of 1984. Duties included forecasting and presenting weather on Detroit area number one station.

3/83-5/84.....WNEV TV 7, 7 Bullfinch Place, Boston, MA 02114

Weather anchor for weekends and vacations, mornings and nights. First employee of WGAN TV to move from the Portland market to Boston. Extensive live shot experience in winter storms and large outdoor events in Boston. Public speaking to adult and student groups across eastern Massachusetts. Support to Chief Meteorologist in storm situations. Experienced use of early computer graphics systems and improved stations on air look. Member of the local chapter of the American Meteorological society.

3/79-4/83.....WGAN TV 13, 1335 Washington Avenue, Portland, ME 04104

Chief Meteorologist for number one rated television news in southern Maine. First Meteorologist hired in stations history. Set new and higher standards of accuracy and credibility for stations weather forecasts and weather image. Responsible for Monday through Friday television weather broadcasts as well as weather forecasts for WGAN radio. Built weather office and greatly improved data gathering capability. Visited schools and spoke at public functions to educate people about the evolving field of meteorology.

5/78-3/79..Environmental Research and Technology, Concord, MA 01742

Meteorologist forecasting air pollution levels in the Eastern and Midwestern United States for large companies and utilities. Clients used forecast of winds and temperature profiles to burn different fuels to conform to pollution regulations. Responsible for forecasting and broadcasting weather reports for eighteen radio stations in the Midwest and Eastern States.

10/76-4/78...Weather Services Corporation, The Great Road, Bedford, MA 01730

Meteorologist for private weather forecasting company. Duties included disseminating forecasting to a wide range of clients. Worked in Iran during winter of 1977/78 as on site Meteorologist in remote Southeastern part of the country. Duties included daily launches of weather balloons with help from Iranians. Used wind data to forecast conditions aloft for site Commander. Forecasts were critical for decisions to fly a blimp that would transmit television signals to local communities.
